Subject index

Acetonitrile,
one-electron reduction and oxidation of (η^5-cyclopentadienyl)(substituted 1,2-ethylenedithiolato)cobalt(III) complexes in ———. Substituent effects on half-wave potentials and ^{1}H- and ^{13}C-NMR chemical shifts (Kajitani et al.) 421
Ad-atoms,
effect of ——— on the electro-oxidation of ethylene glycol and oxalic acid on platinized platinum (Smirnova et al.) 73
Amino acids,
molecular structure–interfacial activity relationship of *N*-substituted ———. Adsorption of *N*-dansylglycine at the mercury–aqueous solution interface (Andreoli et al.) 201
4-Aminobiphenyl,
conducting polymer derived from ——— (Guay et al.) 31
tert-Amyl alcohol,
quantitative investigations of the adsorption of ——— at the Au (100)/aqueous solution interface (Richer, Lipkowski) 217

Background current,
application of square-wave amperometry for flowing systems. Part I. Elimination of ——— (Jędral) 349
Benzene,
electrosynthesis and spectroscopic characterization of poly-*para*-phenylene films prepared by oxidation of ——— in liquid sulfur dioxide (Soubiran et al.) 89
Bipyridine,
adsorption behavior of the ——— complex of cobalt(I) at a mercury electrode (Kato et al.) 193
Unexpected oxidative electropolymerization of ruthenium phenanthroline complexes of 4,4′-——— and bis(pyridyl)ethylene (Fussa-Rydel, Hupp) 417
Bis(pyridyl)ethylene,
unexpected oxidative electropolymerization of ruthenium phenanthroline complexes of 4,4′-bipyridine and ——— (Fussa-Rydel, Hupp) 417
Bond breaking,
competition between a concerted and a sequential electron transfer–——— path in triphenylmethyl phenyl sulphide reduction (Severin et al.) 369
Bromide,
application of square-wave amperometry for flowing systems. Part II. Detection of silver, chloride and ——— ions (Jędral, Hulanicki) 359

Carbon,
electrode kinetics of the oxidation of hydrogen at pretreated glassy ——— and carbon fiber electrodes (Aoki et al.) 63
Charged interfaces,
on the electrical coordinates of maximum adsorption at ——— (Nikitas) 235
Chloride,
application of square-wave amperometry for flowing systems. Part II. Detection of silver, ——— and bromide ions (Jędral, Hulanicki) 359
Chronopotentiometry,
——— with non-linear perturbation functions at the DME with a preceding blank period. Electrode curvature effects and experimental verification (Molina et al.) 249
Cobalt,
adsorption behavior of the bipyridine complex of ———(I) at a mercury electrode (Kato et al.) 193
One-electron reduction and oxidation of (η^5-cyclopentadienyl)(substituted 1,2-ethylenedithiolato)———(III) complexes in acetonitrile. Substituent effects on half-wave potentials and ^{1}H- and ^{13}C-NMR chemical shifts (Kajitani et al.) 421

(η^5-Cyclopentadienyl),
one-electron reduction and oxidation of ———(substituted 1,2-ethylenedithiolato)cobalt(III) complexes in acetonitrile. Substituent effects on half-wave potentials and ^{1}H- and ^{13}C-NMR chemical shifts (Kajitani et al.) 421

N-Dansylglycine,
molecular structure–interfacial activity relationship of *N*-substituted amino acids. Adsorption of ——— at the mercury–aqueous solution interface (Andreoli et al.) 201
Deionization,
charge-controllable polypyrrole/polyelectrolyte composite membranes. Part III. Electrochemical ——— system constructed by anion-exchangeable and cation-exchangeable polypyrrole electrodes (Shimidzu et al.) 323
Dimethyl sulphoxide,
SERS of ——— on silver electrodes and on silver chloride sol (Bukowska, Szklarczyk) 339
Dinitrogen,
electrochemical properties of the catalyst precursor for the ——— fixation cluster: $[Mo_8Mg_2O_{22}(MeO)_6(MeOH)_4]^{2-}$ (Strelets et al.) 383

Electrochromic polymers,
synthesis and properties of ——— from toluidines (Leclerc et al.) 21
Electron transfer,
competition between a concerted and a sequential ———–bond breaking path in triphenylmethyl phenyl sulphide reduction (Severin et al.) 369
Enzyme electrodes,
surface control of platinized platinum as a transducer matrix for micro——— (Ikariyama et al.) 267
1,2-Ethylenedithiolato,
one-electron reduction and oxidation of (η^5-cyclopentadienyl)(substituted ———)cobalt(III) complexes in acetonitrile. Substituent effects on half-wave potentials and ^{1}H- and ^{13}C-NMR chemical shifts (Kajitani et al.) 421
Ethylene glycol,
effect of ad-atoms on the electro-oxidation of ——— and oxalic acid on platinized platinum (Smirnova et al.) 73

Flow-through polarographic detector,
——— for species forming products soluble in mercury during electrochemical reduction (Trojánek et al.) 41
Fluoropentamminocobalt,
electroreduction of ———(III) cation in the presence of specifically adsorbed nitrate anions (Fawcett, Solomon) 183
Formaldehyde,
electrooxidation of formate and ——— on electrodes of alloys between Pd and group IB metals in alkaline media. Part I. Electrocatalytic properties of component metals (Nishimura et al.) 103
Electrooxidation of formate and ——— on electrodes of alloys between Pd and group IB metals in alkaline media. Part II. The possibility of complete oxidation of formaldehyde in weak alkali (Nishimura et al.) 117
Formate,
electrooxidation of ——— and formaldehyde on electrodes of alloys between Pd and group IB metals in alkaline media. Part I. Electrocatalytic properties of component metals (Nishimura et al.) 103
Electrooxidation of ——— and formaldehyde on electrodes of alloys between Pd and group IB metals in alkaline media. Part II. The possibility of complete oxidation of formaldehyde in weak alkali (Nishimura et al.) 117
Fuel cells,
localization of platinum in low catalyst loading electrodes to attain high power densities in SPE ——— (Ticianelli et al.) 275

Gold,
quantitative investigations of the adsorption of tert-amyl alcohol at the ——— (100)/aqueous solution interface (Richer, Lipkowski) 217
Group IB metals,
electrooxidation of formate and formaldehyde on electrodes of alloys between Pd and ——— in alkaline media. Part I. Electrocatalytic properties of component metals (Nishimura et al.) 103
Electrooxidation of formate and formaldehyde on electrodes of alloys between Pd and ——— in alkaline media. Part II. The possibility of complete oxidation of formaldehyde in weak alkali (Nishimura et al.) 117

Heterojunctions,
current–voltage relations in semiconductor interfacial systems. Comparison of electrodes and ——— (Handschuh, Lorenz) 1
Heteropolyanions,
polypyrrole and poly(*N*-methylpyrrole) films doped with Keggin-type ———: preparation and properties (Bidan et al.) 297
Hydrogen peroxide,
electrode kinetics of the oxidation of ——— at pretreated glassy carbon and carbon fiber electrodes (Aoki et al.) 63

Insulin,
ac polarographic reduction of ——— (Trijueque et al.) 173
Iron,
parallel implementation of single potential step voltammetries. (——— (II)/Fe(III) and U(V)/U(VI) systems) (Krulic et al.) 151

Low catalyst loading electrodes,
localization of platinum in ——— to attain high power densities in SPE fuel cells (Ticianelli et al.) 275

Membranes,
charge-controllable polypyrrole/polyelectrolyte composite ———. Part III. Electrochemical deionization system constructed by anion-exchangeable and cation-exchangeable polypyrrole electrodes (Shimidzu et al.) 323
Mercury,
adsorption behavior of the bipyridine complex of cobalt(I) at a ——— electrode (Kato et al.) 193
Chronopotentiometry with non-linear perturbation functions at the DME with a preceding blank period. Electrode curvature effects and experimental verification (Molina et al.) 249
Flow-through polarographic detector for species forming products soluble in ——— during electrochemical reduction (Trojánek et al.) 41
Molecular structure–interfacial activity relationship of *N*-substituted amino acids. Adsorption of *N*-dansylglycine at the ———–aqueous solution interface (Andreoli et al.) 201
Methylamine,
radiotracer study of the strong chemisorption of ——— in alkaline medium at a platinized platinum electrode (Horányi, Rizmayer) 403
N-Methylnicotinamide,
electrochemical behaviour of ——— in acidic media (Marín Galvín et al.) 163
Microemulsion,
electrical conductivity of a water-in-oil ——— system containing an ionic surfactant. Part I. Temperature effect (Dutkiewicz, Robinson) 11
Micro-enzyme electrodes,
surface control of platinized platinum as a transducer matrix for ——— (Ikariyama et al.) 267
$[Mo_8Mg_2O_{22}(MeO)_6(MeOH)_4]^{2-}$,
electrochemical properties of the catalyst precursor for the dinitrogen fixation cluster: ——— (Strelets et al.) 383

Nafion,
electrochemical behaviour of poly(4-vinylpyridine)/———-coated electrodes (Bélanger) 55
Nitrate,
electroreduction of fluoropentamminocobalt(III) cation in the presence of specifically adsorbed ——— anions (Fawcett, Solomon) 183
Nitrilotriacetato,
electroanalytical chemistry of vanadium complexes. Part I. Voltammetric investigation of the vanadium(III)/vanadium(II)–——— redox system (Meier et al.) 143
Nitrogen,
thermodynamic and kinetic constants relative to some molecular equilibria of oxygenated ——— compounds and nitrogen oxychlorides in aprotic media. Application to the mechanistic study of aromatic nitration with N_2O_4 and N_2O_3 (Boughriet, Wartel) 127
Nitrogen oxychlorides,
thermodynamic and kinetic constants relative to some molecular equilibria of oxygenated nitrogen compounds and ——— in aprotic media. Application to the mechanistic study of aromatic nitration with N_2O_4 and N_2O_3 (Boughriet, Wartel) 127

Oxalic acid,
effect of ad-atoms on the electro-oxidation of ethylene glycol and ——— on platinized platinum (Smirnova et al.) 73

Palladium,
electrooxidation of formate and formaldehyde on electrodes of alloys between ——— and group IB metals in alkaline media. Part I. Electrocatalytic properties of component metals (Nishimura et al.) 103
Electrooxidation of formate and formaldehyde on electrodes of alloys between ——— and group IB metals in alkaline media. Part II. The possibility of complete oxidation of formaldehyde in weak alkali (Nishimura et al.) 117
Parsons–Zobel plot,
"———" for systems of suspended particles (Ardizzone, Trasatti) 409
Perturbation functions,
chronopotentiometry with non-linear ——— at the DME with a preceding blank period. Electrode curvature effects and experimental verification (Molina et al.) 249
Phenanthroline,
unexpected oxidative electropolymerization of ruthenium ——— complexes of 4,4′-bipyridine and bis(pyridyl)ethylene (Fussa-Rydel, Hupp) 417
Platinum,
effect of ad-atoms on the electro-oxidation of ethylene glycol and oxalic acid on platinized ——— (Smirnova et al.) 73
Localization of ——— in low catalyst loading electrodes to attain high power densities in SPE fuel cells (Ticianelli et al.) 275
Radiotracer study of the strong chemisorption of methylamine in alkaline medium at a platinized ——— electrode (Horányi, Rizmayer) 403
Surface control of platinized ——— as a tranducer matrix for micro-enzyme electrodes (Ikariyama et al.) 267
Polarographic detector,
flow-through ——— for species forming products soluble in mercury during electrochemical reduction (Trojánek et al.) 41
Poly(*N*-methylpyrrole),
polypyrrole and ——— films doped with Keggin-type heteropolyanions: preparation and properties (Bidan et al.) 297
Poly-*para*-phenylene,
electrosynthesis and spectroscopic characterization of ——— films prepared by oxidation of benzene in liquid sulfur dioxide (Soubiran et al.) 89
Polypyrrole,
charge-controllable ———/polyelectrolyte composite membranes. Part III. Electrochemical deionization system constructed by anion-exchangeable and cation-exchangeable polypyrrole electrodes (Shimidzu et al.) 323
——— and poly(*N*-methylpyrrole) films doped with Keggin-type heteropolyanions: preparation and properties (Bidan et al.) 297
Quartz microbalance study of the electrosynthesis of ——— (Baker, Reynolds) 307
Poly(4-vinylpyridine),
electrochemical behaviour of ———/Nafion-coated electrodes (Bélanger) 55

Quartz microbalance,
——— study of the electrosynthesis of polypyrrole (Baker, Reynolds) 307

Radiotracer study,
——— of the strong chemisorption of methylamine in alkaline medium at a platinized platinum electrode (Horányi, Rizmayer) 403
Ruthenium,
unexpected oxidative electropolymerization of ——— phenanthroline complexes of 4,4′-bipyridine and bis(pyridyl)ethylene (Fussa-Rydel, Hupp) 417

Scanning tunneling microscope,
proposal for the simulation of electrochemical charge transfer in the ——— (Sass, Gimzewski) 241
Semiconductor,
current–voltage relations in ——— interfacial systems. Comparison of electrodes and heterojunctions (Handschuh, Lorenz) 1
Silver,
application of square-wave amperometry for flowing systems. Part II. Detection of ———, chloride and bromide ions (Jędral, Hulanicki) 359
SERS of dimethyl sulphoxide on ——— electrodes and on silver chloride sol (Bukowska, Szklarczyk) 339
Sodium carbonate,
electrochemical behaviour of tungsten in alkaline media. Part II. ——— solutions (Ortiz et al.) 393
Solid polymer electrolyte,
localization of platinum in low catalyst loading electrodes to attain high power density in ——— fuel cells (Ticianelli et al.) 275

Square-wave amperometry,
application of ——— for flowing systems. Part II. Detection of silver, chloride and bromide ions (Jędral, Hulanicki) 359
Application of ——— for flowing systems. Part I. Elimination of background current (Jędral) 349
Sulfur dioxide,
electrosynthesis and spectroscopic characterization of poly-*para*-phenylene films prepared by oxidation of benzene in liquid ——— (Soubiran et al.) 89
Surfactant,
electrical conductivity of a water-in-oil microemulsion system containing an ionic ———. Part I. Temperature effect (Dutkiewicz, Robinson) 11
Suspended particles,
"Parsons–Zobel plot" for systems of ——— (Ardizzone, Trasatti) 409

Toluidines,
synthesis and properties of electrochromic polymers from ——— (Leclerc et al.) 21
Transducer matrix,
surface control of platinized platinum as a ——— for micro-enzyme electrodes (Ikariyama et al.) 267
Triphenylmethyl phenyl sulphide,
competition between a concerted and a sequential electron transfer–bond breaking path in ——— reduction (Severin et al.) 369
Tungsten,
electrochemical behaviour of ——— in alkaline media. Part II. Sodium carbonate solutions (Ortiz et al.) 393

Uranium,
parallel implementation of single potential step voltammetries. (Fe(II)/Fe(III) and ———(V)/U(VI) systems) (Krulic et al.) 151

Vanadium,
electroanalytical chemistry of ——— complexes. Part I. Voltammetric investigation of the vanadium(III)/vanadium(II)–nitrilotriacetato redox system (Meier et al.) 143
